

# Small Cap

As of May 31, 2022

## Strategy Overview

The Byrne Asset Management (BAM) - Small Cap strategy aims to hold 50-70 US small cap stocks. The strategy's investment process combines both a qualitative and quantitative analysis of the stock. The qualitative analysis involves evaluating the strength of the management team and its strategic direction, understanding the sustainability and growth potential of its business model, and evaluating industry trends and the company's competitive position. The quantitative analysis includes a review of the company's financial metrics, valuation analyses and a view on technical and market conditions.
