BYRNE ASSET MANAGEMENT LLC

Strategy Overview

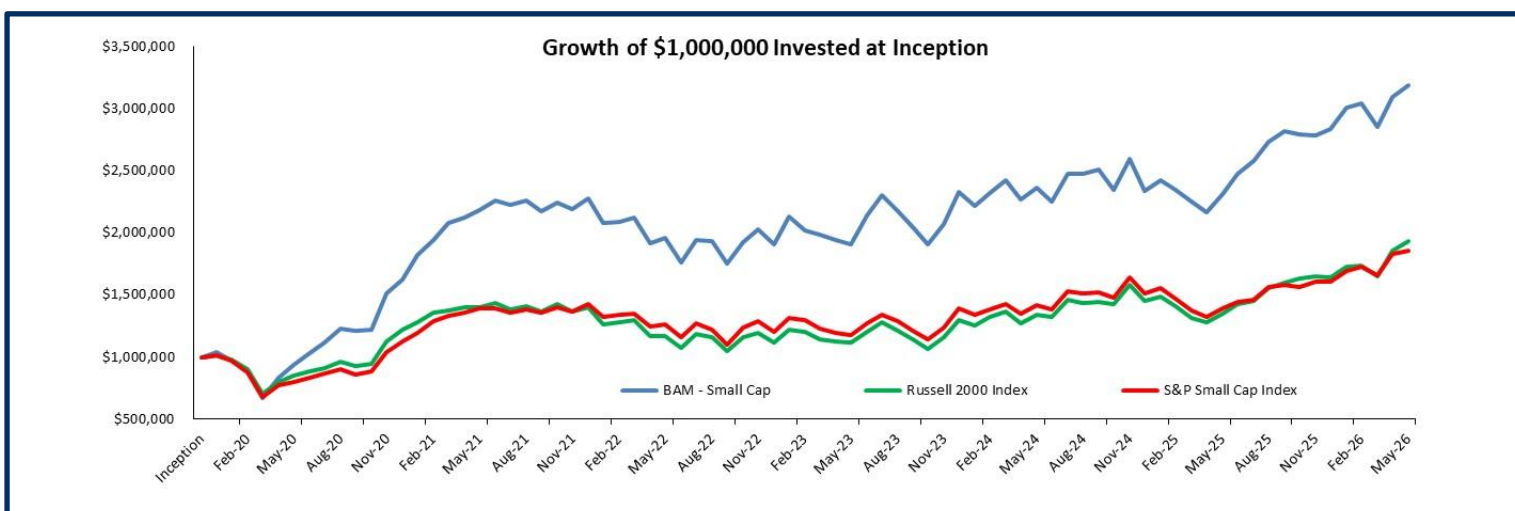

The Byrne Asset Management (BAM) - Small Cap strategy aims to hold US listed small cap stocks. The strategy's investment process combines both a qualitative and quantitative analysis of the stock. The qualitative analysis involves evaluating the strength of the management team and its strategic direction, understanding the sustainability and growth potential of its business model, and evaluating industry trends and the company's competitive position. The quantitative analysis includes a review of the company's financial metrics, valuation analyses and a view on technical and market conditions.

NA¹ - Composite dispersion is not presented for periods with five or fewer portfolios in the composite for the entire year.

NA² - The three-year annualized standard deviation is not presented for periods before 36 months of data is available.

* Total assets under management and assets under advisement was \$1.3 billion as of May 31, 2026.

** Performance is for a partial period from January 1, 2026 to May 31, 2026.

*** Performance is for a partial period from December 12, 2019 to December 31, 2019.

Small Cap Composite: The Small Cap Composite aims to hold US listed small cap stocks. The strategy's investment process combines both a qualitative and quantitative analysis of the stock. The qualitative analysis involves evaluating the strength of the management team and its strategic direction, understanding the sustainability and growth potential of its business model, and evaluating industry trends and the company's competitive position. The quantitative analysis includes a review of the company's financial metrics, valuation analyses and a view of technical and market conditions. The Small Cap composite is compared against the Russell 2000 Index and the S&P Small Cap 600 Index. The Russell 2000 Index is a small-cap stock market index of the smallest 2,000 stocks in the Russell 3000 Index. The S&P Small Cap 600 Index consists of 600 domestic stocks chosen for market size, liquidity, (bid-asked spread, ownership, share turnover and number of no trade days) and industry group representation. There are inherent limitations of comparisons to benchmarks. The Small Cap composite was created in December 2019 and incepted on December 12, 2019.

Byrne Asset Management ("BAM") is an investment adviser registered with United States Securities and Exchange Commission in accordance with the Investment Advisers Act of 1940. The firm's full list of composite descriptions is available upon request.

BAM claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. BAM has not been independently verified.

Results are based on fully discretionary accounts under management. Past performance is not indicative of future results, and this strategy may incur losses. Material market or economic conditions may have a meaningful impact on strategy performance. Realization of gains and losses as well as income received may impact after-tax returns for taxable accounts.

From inception through 2020, the composite consisted of an internally owned non-fee-paying proprietary seed account. The percentage of composite assets held in the internally owned seed account at period end were: 2021 (37%), 2022 (50%), 2023 (53%), 2024 (56%), 2025 (10%) and March 2026 (10%).

The currency used to express performance is USD. Gross-of-fee returns include trading costs. Net-of-fee returns are calculated using a model fee of 1.00% for a non-fee-paying proprietary account and actual fees for fee paying accounts. The model fee is the highest investment management fee that may be charged for this composite, inclusive of expense. The annual model management fee is applied on a monthly basis, by deducting 1/12th of the model fee from the monthly gross returns. Composite dispersion is measured by the asset-weighted standard deviation of annual gross returns of those portfolios included in the composite for the full year. The 3-year annualized standard deviation measures the variability of the composite gross returns and benchmark returns over the preceding 36-month period. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.

The investment management fee schedule is 1.00%. Actual investment advisory fees incurred by clients can vary.

GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.
